for Collectors*

2 Shepherd Street, Mayfair, London W1Y 7LN, England

Tradition

54mm model soldier kits

Ancient and Medieval

In this catalogue we show our range of 54mm figures — the size being the approximate height of figures without the headdress — depicting in accurate detail the armies of the past. The great leaders and the common soldiers alike, all have been designed after much meticulous research into the uniforms and weapons, and created by some of this country's leading craftsmen.

All the figures shown in this catalogue are made of white metal and are available in kit form (they can also be supplied fully hand-painted) to enable you to make an authentic model, evocative of the military glory and romance of a bygone age.

The kits can be easily assembled with epoxy resin adhesive, after first removing any seams from the casting with a small file or craft knife. Before painting, the assembled model should be undercoated — a matt finish white paint is ideal. The figure can be painted with any of the proprietary brands of model paint, PVA-based or oil paints, according to your preference.

Please see the separate price list for the prices and ordering details. Please note that the following two-figure kits — TG5401, TG5402, TG5403, HIST2/3, HIST4/5, AC5E and AC10A/B — are the price of two foot figures. Kits TG5404 and AC5K are the price of mounted figures.

The Squadron Range

SQNS491
Sergeant
Grenadier Company
95th Foot 1781

Squadron Range is the name of a series of figures dedicated solely to depicting the history of the British Army from the English Civil War to the present day. A range of figures which is unique in the modelling world. The figures are produced in groups of five at regular intervals, each group devoted to a specific period of history and each figure representing a uniform study of that period with particular emphasis being given to the unusual periods and orders of dress, the ultimate aim being to produce a complete record of the uniforms of the British Army both in war and peace.

Within this range it is also intended to produce representative figures from the old Empire. To this end a wide selection of figures from the Indian State Forces has already been produced, and a start has been made on the regular Indian Army. Further figures in this section are already planned and will include figures from Canada, Australia, the West Indies and Africa.

As will be appreciated such an undertaking as outlined above is of mammoth proportions. In addition to the Regular Army, cavalry, infantry, artillery and corps, there are also the Yeomanry, Militia and Volunteers, not to mention the Royal Navy and the Royal Air Force. A start has been made with the Yeomanry and it is planned to present figures from all fifty two regiments of this period. Future releases will contain examples of the other branches of the volunteer army.

SQNS4155
Commandant
Alwar State Forces
c.1897

Your attention is also drawn to the complete band of the Royal Marines. The musicians listed here will enable either a regular or staff band to be assembled. It is planned to produce further groups of this type including fife and drum corps and Highland pipes and drums. Other groups of figures will include gun teams and 'vignettes'.

Whether your inclinations are for musicians, particular campaigns or just representative figures from a particular regiment, if the British Army is your scene then the next few pages will be of interest to you.
